## 2. Registration

### 2.1 Section Objectives

Prospective domestic suppliers seeking to do business with GW should register via the [iSupplyGW Portal](#). Registration lets GW know that the supplier is interested in establishing a business relationship and allows the university to issue purchase orders to the supplier and make payments upon completion of work. Modifications to existing supplier registration records (such as adding banking accounts, changing contact personnel, etc.) are also done through the [iSupplyGW Portal](#).

As part of the vendor registration process, all suppliers are checked against the federal government's SAM.gov system as well as TINcheck.com for a series of validation checks. In addition, when acquiring goods and services under federally sponsored programs, GW will not contract with a vendor who is currently either debarred or suspended from doing business with the federal government. Prior to contract award, and in accordance with federal requirements, the university buyer will check the System for Award Management (SAM.gov) to ensure that the prospective contractor does not have an active exclusion. Results from the SAM.gov search shall be made part of the Purchase Order/Contract documentation. Should a prospective vendor be found to be debarred or suspended by the federal government, Procurement will notify the Compliance and Privacy Office, the Office of the Vice President for Research and the Office of the Comptroller of this finding and place a hold on the supplier's registration within the university's financial system.

Athletic officials and individuals receiving honorariums, reimbursements, garnishments, utility suppliers, and refunds are exempt from the registration process. Please see section 3.2 on how to initiate payments to these types of suppliers.

Foreign companies seeking to register as a perspective supplier should complete a [Supplier Registration Packet](#) and the appropriate W-8BEN or W-8BEN-E form as noted in section 1.4.2 above.
